## COMMUNICATION

The communication filed on 10/29/2007 is not fully responsive to the prior Office Action because a statement, see p 11(10/29/2007), that the computer readable form (CRF) and the printed sequence (SEQLIST) listing do not contain new matter in accordance with 37 CFR 1.821(g) is missing.

In this regard, the examiner notes that SEQ ID 34 is drawn the genus Tyr-Xaa-Gly-Phe-Leu with Xaa being any naturally occurring amino acid. In contrast, the "Message" sequences in table 2 of the present specification, are drawn to the species of Tyr-(D)-Thr-Gly-Phe-Leu. Support for the entire genus is could not be found in the disclosure as filed. Similar issues concern SEQ ID 31-33 and 35.

The foregoing analysis should not to be deemed exhaustive, however as there may be other SEQ IDs for which support under 35 USC 112 first paragraph may be lacking. Applicant is requested to carefully consider whether support for each of the newly submitted SEQ IDs exists in the specification as filed and/or submit a substitute sequence listing.

Since the above-mentioned reply appears to be bona fide, applicant is given ONE(1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher M. Gross whose telephone number is (571)272-4446. The examiner can normally be reached on M-F 9-5:30.
